

# Rahul Sya'Ban

Front-End Developer

rahulsyaban@gmail.com • 085718927573  
LinkedIn • GitHub • Website • Jakarta, Indonesia

## Profile

Front-End Developer with 3+ years of experience building and shipping production-ready web applications — primarily across e-commerce platforms, corporate travel management systems, and content management systems, with additional mobile development experience using React Native. Specializing in React, Next.js, and Angular, with a solid foundation in component architecture, state management, and API integration. Brings hands-on backend experience to collaborate effectively with backend engineers on API design — ensuring the data layer aligns with what the interface actually needs.

## Professional Experience

**Binari Digital Teknologi, Jakarta, Indonesia**

Feb 2023 to Present

Fulltime (remote) - Front-End Developer

- Worked directly with the CTO to define and lead frontend architecture across multiple concurrent projects — independently setting up component libraries, routing structures, and state management patterns from scratch on greenfield projects while adapting to existing architectures on ongoing ones, ensuring consistency and scalability across the team.
- Built ExsportBags e-commerce platform end-to-end — delivering a full-featured admin CMS for product and order management alongside a performant customer-facing storefront using Next.js.
- Developed and maintained Pholivery, a photo sharing platform, implementing optimized large-file upload handling through image compression and asynchronous processing — improving upload performance by up to 50% via a presigned-URL upload strategy.
- Led front-end migration of Inact, a legacy PHP Document Management System, to a modern Angular-based architecture — improving code maintainability, enabling new feature development, and integrating with RESTful and .NET backends for reliable data synchronization.

**Outsourced to Mitra Berkat Digital (Project Based)**

Dec 2025 to Mar 2026

Fulltime (hybrid) - Frontend Developer & Backend Developer

- Collaborated with UI/UX designers and a small frontend team to build and ship production-ready interfaces, translating wireframes into high-performance, visually polished user experiences.
- Built Drupadi from scratch — a Corporate Travel Management web platform enabling enterprise clients to manage flight and hotel bookings, integrating complex third-party APIs to deliver real-time inventory availability and seamless reservation flows.
- Contributed to backend development for Drupadi's e-ticket generation and flight booking services, bridging frontend requirements with API design to ensure reliable data consistency across the booking pipeline.
- Optimized booking data flow and streamlined the payment process on the Goldenrama tour platform, improving checkout reliability and overall user experience.

**Daytrans, Jakarta, Indonesia**

Jul 2022 to Jan 2023

## Freelance (remote) - Front-End Developer

- Maintained and improved the Daytrans React Native mobile app, enhancing cross-platform performance and feature parity across iOS and Android through targeted bug fixes and optimizations.
- Extended the DayMall e-commerce platform with a flash sale feature — modifying existing purchase flows to support time-limited discounts, enabling users to buy products at promotional prices within a defined window.
- Added hotel booking functionality to an existing platform, implementing room search, reservation management, and booking history flows to expand the platform's service offerings.
- Maintained a React.js CMS to streamline internal content management, accelerating content update cycles for the operations team across multiple platform properties.

## Dapure ID, Jakarta, Indonesia

Jul 2022 to Aug 2022

### Freelance (remote) - Front-End Developer

- Led end-to-end development of Dapure ID's React Native e-commerce MVP from scratch within 1–2 months — collaborating closely with UI/UX designer to translate wireframes into a fully functional fresh produce shopping app, covering product catalog, cart, and checkout flows.
- Engineered real-time order processing and live shipping status tracking, improving order visibility and building user trust throughout the post-purchase experience.
- Integrated Xendit payment gateway with comprehensive error handling — covering failed transactions, timeout scenarios, and retry logic — ensuring a secure and seamless checkout experience.
- Owned the full frontend lifecycle independently, from architecture decisions and component design to API integration and production delivery.

## fLAND, Jakarta, Indonesia

Nov 2020 to Dec 2021

### Fulltime (remote) - Front-End Developer

- Contributed to the React Native mobile frontend for a role-play social networking app, collaborating within a small frontend team to deliver intuitive UI across social feed, user profiles, and role-play features.
- Implemented real-time messaging and live interaction features by integrating with backend real-time services, enabling seamless in-app communication and live social engagement.
- Built reusable, testable components with structured state management, improving code maintainability and accelerating feature delivery across the team.
- Resolved critical bugs and optimized app performance, improving overall stability and user experience in a production mobile environment.

## Key Projects

### Drupadi — Corporate Travel Management Platform

Tech: Next.js, NestJS, Third-party Flight & Hotel APIs

Built from scratch — a web platform enabling enterprise clients to manage flight and hotel bookings with real-time inventory availability, e-ticket generation.

### ExsportBags — E-Commerce Platform

Tech: Next.js, RESTful API, GraphQL

Built end-to-end — delivering a full-featured admin CMS for product and order management alongside a performant customer-facing storefront.

## Pholivery — Photo Sharing Platform

Tech: Next.js, Material UI, WebSocket

Developed and maintained a photo sharing app with optimized large-file upload handling — achieving up to 50% faster upload performance through image compression and a presigned-URL upload strategy.

## Daytrans — Multi-Platform Product Suite

Tech: React Native, React.js

Contributed to a suite of interconnected platforms — maintaining and improving the Daytrans mobile app (iOS & Android), extending DayMall e-commerce with flash sale functionality, adding hotel booking features, and maintaining a React.js CMS to streamline internal content operations.

## Education

### University Of Gunadarma

Information Systems, Depok, Jawa Barat

Sept 2018 to Sept 2022

### SMK Prestasi Prima

Software Engineering, Jakarta

Jan 2015 to Jan 2018

## Areas of Expertise

Languages JavaScript (ES6+), TypeScript

Frontend React.js, Next.js, Angular, React Native, Redux, React Query, Apollo Client, Tailwind CSS, Shadcn UI

Backend NestJS, RESTful API

Tools Git, Firebase, Docker, Figma

Testing Jest, React Testing Library, Cypress
